CLASSROOM OS · TEAM VERSATILE

ClassPulse

Enter the future of learning

An open-source smart classroom OS that turns online learning into a place students can explore, practise, ask, and grow.

THE CHALLENGE

Education is open, but learning still feels fragmented

Students jump between lectures, assignments, doubts, tests, and progress tools.

Teachers need one connected view of attendance, performance, feedback, and intervention.

Access should work across devices, roles, languages, and comfort needs.

Theme 2 · Idea 3: open tools that help anyone learn, in any language, on any device.

Made with GAMMA

THE INTERFACE

ClassPulse makes the campus the interface

3D CAMPUS

Explore

Enter a school-like world.

2D DASHBOARD

Focus

Fast, accessible daily work.

Classroom

Library

Arcade

Enter a school-like world instead of opening a static dashboard.

Switch instantly to fast, accessible daily work.

3D campus → 2D dashboard → Personal path

Classroom · library · arcade · doubt lab · tests · meetings · profile

THE JOURNEY

One student journey, connected end to end

Enter

Open a lecture, test, or challenge in the 3D classroom.

Practise

Use the Learning Arcade and earn progress, not pressure.

Ask

Submit a doubt with text, image, formula, drawing, or voice note.

Resolve

Get teacher guidance, whiteboard annotation, and a saved resolution.

Made with GAMMA

KEY MOMENTS

Built around the moments that change outcomes

The experience meets students where momentum is won or lost.

Learning Arcade

Playable algorithm, maths, logic, and coding challenges.

Doubt Lab

Guided hints, collaborative whiteboard, threads, FAQ, and heatmap.

Teacher intelligence

Transparent insights tied to attendance, marks, practice, and submissions.

Comfort Panel

Light, dark, warm-reading, contrast, text, motion, focus, and eye-rest controls.

Made with GAMMA

TRUST LAYER

Open by design. Honest by default.

Access, recommendations, and privacy should be understandable before they become a problem.

Open-source architecture

Real persistence, role-based access, and server-side validation.

Accessible fallback

When 3D is unavailable, core navigation remains.

Transparent intelligence

Every recommendation explains why it appeared.

Privacy-first foundations

Permissions, signed files, consent, export, and deletion controls.

Made with GAMMA

TEAM VERSATILE

ClassPulse is not another portal.

Team Versatile — building a school students want to enter
